PROFILE

Passionate Senior Frontend Engineer with a decade of experience building scalable applications serving millions of users daily. Expert in React, TypeScript, and modern frontend architecture, with proven impact delivering APIs handling 1M+ requests/day and leading platform migrations that improved performance by 30%. Dedicated to best practices, component-driven development, and exceptional user experience across cross-functional teams.

EDUCATION

California Institute of Technology   Pasadena, CA | 2008 - 2012
B.S. in Computer Science

WORK EXPERIENCE

Senior AI Engineer
Innovate AI, San Francisco, CA   July 2021 - Present

- Created a complex data visualization dashboard with React and D3.js to display model performance metrics.
- Championed the adoption of a design system, ensuring UI consistency across all AI products.
- Developed a full-stack application for real-time log analysis using Node.js, React, and WebSocket.
- Designed and implemented a REST API for a new semantic search feature, serving over 1M requests per day.
- Developed and maintained over 15 full-stack web applications for clients using the MERN stack.

Senior Software Engineer
NextGen Solutions, Palo Alto, CA   June 2016 - July 2021

- Led the migration of a legacy jQuery frontend to a modern React and TypeScript stack.
- Improved web application performance, achieving a 30% faster load time and a Lighthouse score of 95.
- Built a reusable component library that was adopted by three different product teams.
- Architected and led the development of a new microservices-based platform from scratch using Node.js and React.
- Developed and maintained over 15 full-stack web applications for clients using the MERN stack.

Software Engineer
Web Weavers Inc., Austin, TX   August 2012 - June 2016

- Translated complex design mockups into pixel-perfect, responsive web pages using HTML, CSS, and JavaScript.
- Worked closely with designers to improve user experience and accessibility.
- Developed and maintained over 15 full-stack web applications for clients using the MERN stack.

INDEPENDENT PROJECTS

Claude Code Job Tailor, Open Source   2025

An AI-powered job application assistant that treats your resume as code, automatically tailoring it for specific roles by analyzing job descriptions and selecting the most relevant skills and achievements.

- Developed a data-driven system to manage resume content in structured YAML files.
- Created a PDF generation service using @react-pdf/renderer to produce professional, ATS-friendly resumes.
- Implemented a live preview server with hot reload using Bun.js to facilitate rapid template development.

TECHNICAL SKILLS

Frontend Development: React, TypeScript, Next.js, JavaScript (ES6+), HTML5 & CSS3, Tailwind CSS
Backend Development: Node.js, Express.js, Python, FastAPI, PostgreSQL
Systems & Architecture: Microservices Architecture, REST APIs, Docker, Kubernetes
Version Control: Git, GitHub, GitLab

LANGUAGES

Spanish (Native) • English (Professional Working Proficiency) • German (Professional Working Proficiency)

CORE COMPETENCIES

Cross-functional Teamwork • Agile/Scrum Methodologies • Analytical Thinking • Strategic Planning • Technical Documentation • Stakeholder Communication • Mentorship & Coaching • Pattern Recognition • Clear Code Commenting
